National Emergency Response and Rescue Training Center
ADVANCED CRITICAL INFRASTRUCTURE PROTECTION

MGT-414

The purpose of this management level course is to extend the knowledge, skills, and abilities developed in the awareness level course (AWR-213) and to formulate considerations for the resilience of jurisdictional assets leveraging cross-sector partnerships. These considerations, as part of a resilience action plan, will enhance the whole community’s ability to manage the risk associated with critical infrastructure protection efforts. Participants receive a template for presenting all of the relevant data for jurisdictional or regional resilience.

Major topics include:
- Describe the national strategy of resilience relative to the local partner role
- Describe the whole community approach relative to the National Preparedness Goal
- Identify and prioritize jurisdictional critical infrastructure assets and interdependencies across all Critical Infrastructure sectors
- Describe the purpose and components of a resilience plan
- Analyze asset and sector impact on jurisdictional resilience
- Develop options for sector-specific next steps for highest-priority sectors
- Develop a list of jurisdiction-level (regional) resilience actions

Training Level: Management and Planning
Venue: Your jurisdiction
Course Length: One day (8 hours)
Participant Audience:
- Critical infrastructure owners, operators, and managers
- State, local, tribal, and territorial government senior officials and managers
- DHS personnel
- Sector-Specific Agency managers
- Other managers with critical infrastructure responsibilities

Prerequisites: None, however, attendance in AWR-213 is highly recommended. If attendance is not possible, completion of the IS-860 online course is suggested.
